Maximum fast and secure installation!

- Reduction of panel installation time by 75%. Instead of four single MDC connectors per MDC Quad, only one trunk leg with MDC Quad coupler must be plugged
  - MDC Quad couplers at MDC connectors of the trunk legs protecting the connector tip surfaces against contamination and damage
  - Position permutation within the MDC Quad couplers are excluded by factory assembling
- The individual MDC connectors at the trunk legs, can be unplugged in case of service is needed, the other three within the MDC Quad coupler remain in operation
